SUBJECT INDEX

RN denotes a Research Note, TN a Technical Note, A an Abstract, L a letter to the Editor, MA material under the Matters Arising heading.

Abnormal Ocular Conditions

Target direction effects in visual field plots in a retinitis pigmentosa family (L), 85.
A quantitative analysis of nerves in keratoconic and normal corneas (A), 96.
The manipulation of perimetric stimulus parameters in retinitis pigmentosa (A), 97.
A "hidden" deficit in central vision in diabetic pan-retinal photocoagulation patients, 249.
An averaging method for the interpretation of the Farnsworth-Munsell 100-Hue Test -II. Colour vision defects acquired in ddiabetic retinopathy, 281.
A comparative study in the use of closed-circuit television reading machines and optical aids by patients with retinitis pigmentosa and maculopathy, 293.
Dark-room methods of enhancing details in diabetic fundus photographs: a preliminary study, 387.
Analysis of early diabetic retinopathy by computer processing of fundus images - a preliminary study, 393.
Screening for retinopathy of prematurity, 401.
Foveal and extra-foveal measures of short wavelength sensitive pathways in glaucoma and ocular hypertension, 403.
Changes in oscillatory potentials of the ERG in diabetic retinopathy, 477.
Eye disease in Northern Nigeria: prevalence, age and sex difference, 481.

Accommodation

The effect of stimulus contrast on the accommodation response, 9.
Interocular equality of tonic accommodation and consensuality of accommodative hysterisis, 17.
Effect of a near vision task on the response AC/A ratio of a myopic population (A), 96.
The relationship between cognitive induced changes in tonic accommodation and ciliary muscle innervation (A), 96.
Accommodation dynamics in amblyopic observers (A), 97.
The relationship between retinal target eccentricity and the accommodative response (A), 97.
Ocular modulation transfer and sensitivity to changes in focus (A), 98.
The effect of stimulus contrast on accommodation (A), 98.
Oculomotor consequences of beta-adrenoceptor antagonism during sustained near vision, 127.
Time course and decay of effects of near work on tonic accommodation and tonic vergence, 131.
Effect of target content at higher spatial frequencies on the accuracy of the accommodation response, 137.
Variation of dark focus of accommodation with laser speckle exposure duration, 143.

On the use of small artificial pupils to open-loop the accommodation system (L), 191.
The effect of spatial frequency on steady-state accommodation, 211.
Effects of relaxation and aversive visual stimulation on dark focus accommodation, 219.
Effect of near vision task on the response AC/A of a myopic population, 225.
Power spectrum analysis in the study of ocular mechanisms (TN), 321.
Near vision stress: vergence adaptation and accommodative fatigue, 353.
Beta- adrenergic antagonism in myopia, 359.
Amblyopia, accommodation and colour, 365.
Accommodation and late-onset myopia (A), 447.

Age — Infant refractive errors - a longitudinal study from birth to one year (A), 93.
A longitudinal study of the age dependence of human ocular refraction - III. The mediation of changes from direct to inverse astigmatism by means of matrices of transition probabilities, 175.
Cessation age of childhood myopia progression (MA) 195.
Movement in decline ? Oscillatory movement displacement thresholds increase with ageing, 411.
Contract sensitivity decline with ageing: a neural or optical phenomenon?, 415.

Amblyopia — The use of computerized contrast sensitivity, Arden gratings and low contrast letter charts in the assessment of amblyopia, 43.
Asymmetric OKN in amblyopia - the contribution of binocularity (A), 97.
Accommodation dynamics in amblyopia observers (A), 97.
Amblyopia, accommodation and colour, 365.
Impairment of contrast discrimination in amblyopic eyes, 461.

Ametropia — Effect of near vision task on the response AC/A ratio of a myopic population (A), 96.
A model for retinal shape changes in ametropia, 159.
A longitudinal study of the age dependence of human ocular refraction- III. The mediation of changes from direct to inverse astigmatism examined by means of matrices of transition probabilities, 175.
Cessation of age of childhood myopia progression (MA), 195.
Beta-adrenergic antagonism in myopia, 359.
Accommodation and late-onset myopia (A), 447.

Anatomy — A quantitative analyis of nerves in keratoconic and normal corneas (A), 96.

Apparent Movement — The influence of temporal frequency and wavelength on beta movement, 5

Arden Gratings — The use of computerized contrast sensitivity, Arden gratings and low contrast letter charts in the assessment of amblyopia, 43.

Aspheric Surfaces — Generalization of the Tscherning theory: optimization of aspheric ophthalmic lenses, 63.
Spectacle lenses and third-order distortion, 303.

Astigmatism — A longitudinal study of the age dependence of human ocular refraction - III. The mediation of changes from direct to inverse astigmatism examined by means of matrices of transition probabilities, 175.

Atropine — A review of the uses and adverse effects of topical administration of atropine, 109.

Beta Movement — The influence of temporal frequency and wavelength on beta movement, 5.

Binocular Vision — Fixation disparity in binocular stress, 37
Differentiating between monocular and binocular neurone responses by threshold elevation, 93.
A clinical investigation into a possible corre lation of adaptability to induced vertical muscle imbalance and visual symptoms due to small vertical phorias (A), 95.
Asymmetric OKN in amblyopia - the condition of binocularity (A),97.
The orthophorization of heterophoria 169.
The clinical assessment of binocular vision before and after a working day, 349.
Binocular contrast detection with unequal monocular illuminance, 373.
The orthophorization of heterophoria (A), 447.
The influence of monocular defocus and deffusive blur on binocular contrast sensitivity (A). 447.

Book Reviews — Cataract and Implant Surgery, J.J. Kanaski and R.B.S. Packard, 103.
Chandler and Grant's Glaucoma D.L. Epstein, 104
Dictionary of Optometry, M.M. Millodot , 511.
Geriatric Ophthalmology, Ed. M.L. Kwitko and F.J. Weinstock, 99.
Hazards of Light: Myths and Realities, Ed. J Cronly-Dillon, E.S. Rosen and J Marshall , 328.
Law and Management in Optometric Practice, S.P. Taylor and D.P. Austen, 201.
Manual of Common Ophthalmic Surgical Procedures, Ed. C.D. Phelps and H.E.J.W. Kolder., 511.
Medical Aspects of Fitness to Drive, Ed. A. Raffle,202
Ocular Accommodation Convergence and Fixation Disparity: A Manual of Clinical Analysis, D.A. Gross, 102.
Ocular Immunology, G.Smolin and G.R. O'Connor, 327.
Oculoplastic Surgery, Ed. C.D. McCord and M. Tanenbawn, 512.
Ophthalmic Optics, N.C. Kawshik, 329.
Pathology of the Eye, Ed. G.O.H. Naumann and D.J. Apple, 328.
Pediatric Ophthalmology and Strabismus, Transactions of the New Orleans Academy of Ophthalmology, 34th Annual Session, 100.
Progress in Retinal Research, Volume 5, Ed. N. Osbourne and G. Chader, 201.
Retinoblastoma, Ed. F.C. Blodi, 327
Techniques in Ophthalmic Plastic Surgery, Ed. R.E. Wesley, 104.
The Molecular Mechanism of Photoreception, Ed. H. Stieve, 513.
The Physiology of the Cornea and Contact Lens Applications H. Damano and H.E. Kaufman. 512.
Vision in Vehicles, Ed. A.G. Gale, M.H. Freeman, C.M. Haslegrave P. Smith and S.P. Taylor, 202.

Bradford University , Guest Editorial, 339.

Case Histories — Clinical use of diagnostic tests, 437.

Cataract — Corneal parameter changes after cataract extraction (A),98
Editorial: Vision behind the cataract , 207.

Children's Vision — Infant refractive errors - a longitudinal study from birth to one year (A), 93.
Screening for retinopathy of prematurity, 401.
The application of a comprehensive visual screening programme to children aged 3 to 5 years, 469.

Clinical Decisions — Clinical use of diagnostic tests, 437.
The clinical significance of change., 441.

Closed-circuit Television — A comparative study in the use of closed-circuit television reading machines and optical aids by patients with retinitis pigmentosaand maculopathy, 293.

Colour Vision — An averaging method for the interpretation of the Farnsworth-Munsell 100 Hue test - I. Congenital colour vision defects, 267.
An averaging method for the interpretation of the Farnsworth-Munsell 100 Hue test - II. Colour vision defects acquired in diabetic retinopathy,281
F-M 100 Hue total error scores have discrete valued (TN), 325.
Foveal and extra-foveal measures of short wavelength sensitive pathways in glaucoma and ocular hypertension, 403.
The clinical significance of change., 441.

Computer Processing — Computer processing of ocular photographs - a review, 379.
Analysis of early diabetic retinopathy by computer processing of fundus images - a preliminary study, 393.

Contact Lenses — Reliability of the wetting value of tears, 53.
Structure of the tear film during the blinking process (RN), 81.
The effect of prismatic specatcle and contact lens corrections on ocular rotation (MA), 89.
The correlation between the change in ultra-thin lens curvature and corneal curvature (A), 95.
Stereopsis with monovision and two concentric bifocal lens systems, (A), 96
A review of the theoretical concepts, measurement systems and application of contact lens oxygen permeability, 485.

Contrast — The effect of stimulus contrast on the accommodation response, 9.
The effect of stimulus contrast on accommodation (A), 96.

Contrast Sensitivity — A quantitative investigation into the effects of pupil diameter and defocus on contrast sensitivity for an extended range of spatial frequencies in natural and homatropinized eyes, 21.
The use of computerized contrast sensitivity, Arden gratings and low contrast letter charts in the assessment of amblyopia, 43.
Differentiating between monocular and binocular neurone responses by threshold elevation (A), 93.
A "hidden" deficit in central vision in diabetic pan-retinal photocoagulation patients, 249
Binocular contrast detection with unequal monocular illuminance, 373.
Contrast sensitivity decline with ageing : a neural or optical phenomenon? , 415.
The influence of monocular defocus, and diffusive blur on binocular contrast sensitivity (A),447.
Impairment of contrast discrimination in amblyopic eyes, 416.

Convergence — Effect of a near vision task on the response AC/A ration of a myopic population (A), 96.
Oculomotor consequences of beta-adrenoceptor antagonism during sustained near vision, 127.
Effect on a near vision task on the response AC/A of a myopic population, 225.
Near vision stress: vergence adaptation and accommodation fatigue, 353.

Cornea
The correlation between the change in ultra-thin lens curvature and corneal curvature (A), 95
A quantative analysis of nerves in keratoconic and normal corneas, 96
Corneal parameter changes after cataract extraction (A), 98
Refractive index of the mammalian cornea and its influence during pachometry (L), 503.

Dark Focus
Variation of dark focus of accommodation with laser speckle exposure duration, 143.
Effects of relaxation and aversive visual stimulation on dark focus accommodation, 219..

Defocus
A quantitative investigation into the effects of pupil diameter and defocus on contrast sensitivity for an extended range of spatial frequencies in natural and homatropinized eyes, 21.
The resistance of movement displacement thresholds to optical image degradation - a clinical use? (A), 95
Ocular modulation transfer and sensitivity to changes in focus, 98.
Oscillatory movement displacment thresholds: resistance to optical image degradation, 121.
Effect of defocus on visual field measurement, 259.
The influence of monocular defocus and diffusive blur on binocular contrast sensitivity (A), 447.

Diabetic retinopathy
A "hidden" deficit in central vision in diabetic pan-retinal photocoagulation patients, 249.
An averaging method for the interpretation of the Farnsworth-Munsell 100 Hue test - II. Colour vision defects acquired in diabetic retinopathy, 281.
Dark-room methods of enhancing details in diabetic fundus photographs : a preliminary study, 387.
Analysis of early diabetic retinopathy by computer processing of fundus images - a preliminary study, 393.
Changes of oscillatory potentials of the ERG in diabetic retinopathy. 447.

Displacment Thresholds
The resistance of movement displacement thresholds to optical image degradation - a clinical use (A), 95.
Oscillatory movement displacement thresholds: resistance to optical image degradation, 121.
Movement in decline?
Oscillatory movement displacement thresholds increase with ageing, 411.

Driving
Three South African studies on the relation between road accidents and drivers' vision, 73.
Vision and driving, 187
Object-motion detection affected by concurrent self-motion perception: applied aspects for vehicle guidance, 309.

Drugs
The relationship between cognitive induced changes in tonic accommodation and ciliary muscle innervation (A), 96.
A review of the uses and adverse effects of topical administration of atropine, 109.
Oculomotor consequences of beta-adrenoceptor antagonism during sustained near vision, 127,
Beta-adrenergic antagonism in myopia, 359.
The Marton Lecture: ocular manifestations of systemic medication, 449.

Editorial
Editorial: W.S. Stiles and the variation in directoral sensitivity of the retina, 1.
Editorial: Towards improved visual aids for the partially sighted, 107.
Editorial: Vision behind the cataract, 207
Editorial, 337.
Guest Editorial, 339.

Education
World Optometry, 115

Electrophysiology
Evidence of spatial tuning in peripheral vision from the pattern electroretinogram (A),93.
Visual evoked potentials elicited by pattern stimuli in the foveal area (A), 94.
A study of the electrophysiology of retinal pigment epithelium (A). 95.
An improved method for using the DTL fibre in electroretinography (TN), 315
Visual acuity prediction using the visual evoked response, 421.
Changes of oscillatory potentials of the ERG in diabetic retinopathy, 477.

Electroretinogram
Evidence of spatial tuning in peripheral vision from the pattern electroretinogram (A), 93.
An improved method for using the DTL fibre in electroretinography (TN), 315.
Changes of oscillatory potentials of the ERG in diabetic retinopathy, 477.

Extraocular Muscles
Excursion tests of ocular motility, 36
Current concepts of the actions of the extraocular muscles and the interpretation of oculomotility tests, 341.

Eye Movement
Excursion tests of ocular motility, 31.
The effect of prismatic spectacle and contact lens corrections on ocular rotation (MA), 189.
Current concepts of the actions of the extraocular muscles in the interpretation of oculomotility tests, 341.
S imulation of a retinal scotoma by a stabilized retinal image (TN),495.
Variation of saccadic suppression with target eccentricity (L), 499.

Fixation Disparity
Fixation disparity in binocular stress, 37
The effect on fixation disparity and associated heterophoria of reading at an abnormally close distance. 345.

Foveal Avascular Zone
Psychophysical measurement of the foveal avascular zone, 405.

Glaucoma
Foveal and extra-foveal measures of short wavelength sensitive pathways in glaucoma and ocular hypertension, 403.

Gloom
The physiological basis for the sensation of gloom: quantitative and qualitative aspects , 161.
Bad light stops play, 165.

Heterophoria
A Clinical investigation into a possible corre lation of adaptability to induced vertical muscle imbalance and visual symptoms due to small vertical phorias (A), 95.
The orthophorization of heterophoria, 169.
The effect of fixation disparity and associated heterophoria of reading at an abnormally close distance, 345.
The orthophorization of heterophoria (A), 447.
Heterophoria: a vergence adaptive position (MA), 507.

Hyperacuity
Theory and evidence for a clinical hyperacuity test, 431.

In the News	In the News 105, 331, 515.
Instrumentation	The use of computerized contrast sensitivity, Arden gratings and low contrast letter charts in the assessment of amblyopia, 43. The distribution of visual field scores in a normal population (A) 94, A manipulation of perimetric stimulus parameters in retinitis pigmentosa (A), 97. Editorial: Vision behind the cataract, 207. An averaging method for the interpretation of the Farnsworth-Munsell 100 Hue test - I. Congenital colour vision defects, 267. An improved method for using the DTL fibre in electroretinography (TN), 315 F-M 100 Hue total error scores have discrete values (TN) 325. Visual acuity prediction using the visual evoked reponse, Pupil respnse as an objective measure of visual acuity, 425. Theory and evidence for a clinical hyperacuity test, 431. The clinical significance of change, 441. Computer-assisted perimetry (A), 447. A review of the theoretical concepts, measurement systems and application of contact lens oxygen permeability, 485. The chromatic aberration adjustment in laser optometry (RN), 491. Simulation of a retinal scotoma by a stabilized retinal image (TN),495. Refractive index of the mammalian cornea and its influence during pachometry (L), 503.
Kerataconus	A quantitative analysis of nerves in Keratoconic and normal corneas (A), 96
Laser Optometry	Variation of dark focus of accommodation with laser speckle exposure duration, 143. The chromatic aberration adjustment in laser optometry (RN), 491.
Letter Charts	The use of computerized contrast sensitivity, Arden gratings and low contrast letter charts in the assessment of amblyopia, 43.
Low Vision	Editorial: Towards improved visual aids for the partially sighted,107 A conparative study in the use of closed-circuit television reading machines and optical aids by patients with retinitis pigmentosa and retinopathy, 293
Luminanace	The physiological basis for the sensation of gloom; quantitative and qualitative aspects, 161. Bad light stops play, 165.
Maculopathy	A comparative study in the use of closed-circuit television reading machines and optical aids by patients with retinitis pigmentosa and maculopathy, 293.
Marton Lecture	The Marton Lecture: ocular manifestations of systemic medication, 449.
Modulation transfrer Function	Ocular modulation transfer and sensitivity to changes in focus, (A),98
Mobility	Excursion tests of ocular motility, 31. Current concepts of the actions of the extraocular muscles and the interpretation of oculomotility tests. 341.
Motion	Oscillatory movement displacement thresholds: resistance to optical image degradation, 121. Object motion detection affected by concurrent self-motion perception: applied aspects for vehicle guidance, 309. Movement in decline? Oscillatory movement displacement thresholds increase with ageing, 411.

Myopia
Effect of a near vision task on the response AC/A ratio of a myopic population (A), 96
Cessation age of childhood myopia progression (MA), 195.
Effect of a near vision task on the response AC/A of a myopic population, ,225.
Near vision stress: vergence adaptation and accommodative fatigue, 353.
Beta-adrenergic antagonism in myopia, 359.
Accommodation and late-onset myopia (A), 447.

Near Vision
Interocular equality of tonic accommodation and consensuality of accommodative hysteresis, 17.
Effect of a near vision task on the response AC/A ratio of a myopic population (A), 96.
Oculomotor consequences of beta-adrenoceptor antagonism during sustained near vision, 127
Time course and decay of effects of near work on tonic accommodation and tonic vergence, 131.
Effect of a near-vision tack on the response AC/A of a myopic population, 225
The effect on fixation disparity and associated heterophoria of reading at an abnormally close distance, 345.

Nigeria
The distribution of refractive errors in Nigeria, 241.
Eye disease in Northern Nigeria: prevalence, age and sex differences, 481.

Obituaries
Yves Le Grand,1908 - 1986, 91
Geoffrey John Burton,1949 - 1986 , 199
Gerald Maurice Dunn, 199

Occupational Ophthalmic Optics
Three South African Studies on the relation between road accidents and drivers' vision, 73
The physiological basis for the sensation of gloom: quantitative and qualitative aspects , 161
Bad light stops play , 165
Vision and driving, 187
Object-motion detection affected by concurrent self-motion perception: applied aspects for vehicle guidance, 309.
Eye injuries incurred at work and at play, 333.
The clinical assessment of binocular vision before and after a working day; 349.

Ocular aberration
A schematic eye model for the effects of translation and rotation of ocular components on peripheral astigmatism, 153
Schematic modelling of peripheral astigmatism in real eyes, 235
The chromatic aberration adjustment in laser optometry (RN), 491.

Ocular hypertension
Foveal and extra foveal measures of short wavelength sensitive pathways in glaucoma and ocular hypertension, 403.

Ocular Photography
Computer processing of ocular photographs - a review, 379.
Dark-room methods of enhancing details in diabetic fundus photographs: a preliminary study, 387.
Analysis of early diabetic retinopathy by computer processing of fundus images - a preliminary study, 393.
Techniques and applications of ocular photography - a review (A),447.

Ophthalmic Prisms
Fixation disparity in binocular stress, 37
Vertical yoked prism - patient acceptance and postural adjustment, 225
Heterophoria: a vergence adaptive position (MA), 507.

Optical Blur — A quantitative investigation into the effects of pupil diameter and defocus on contrast sensitivity for an extended range of spatial frequencies in natural and homatropinized eyes, 21.
The resistance of movement displacement thresholds to optical image degradation - a clinical use? (A), 95.
Ocular modulation transfer and sensitivity to changes in focus, 98.
Oscillatory movement displacement thresholds: resistance to optical image degradation, 121.
Effect on defocus on visual field measurement, 259.
The influence of monocular defocus and diffusive blur on binocular contrast sensitivity (A), 447.

Optical Design — Generalization of the Tscherning theory: optimization of aspheric ophthalmic lenses, 63.
Editorial, Towards improved visual aids for the partially sighted, 107
Spectacle lenses and third order distortion, 303.

Optokinetic Nystagmus — Asymmetric OKN in amblyopia - the contribution of binocularity (A), 97.

Orthoptics — Excursion tests of ocular motility, 31.
Simulation of squint (L), 87.
The orthophorization of heterophoria, 169.
Vertical yoked prism-patient acceptance and postural adjustment, 253.
Current concepts of the actions of the extraocular muscles and the interpretation of oculomotility tests, 341.
The orthophorization of heterophoria (A), 447.

Oxygen Permeability — A review of the theoretical concepts, measurement systems and application of contact lens oxygen permeability, 485.

Pachometry — Refractive index of the mammalian cornea and its influence during pachometry (L), 503.

Partial Sight — Editorial: Towards improved visual aids for the partially sighted, 107.
A comparative study in the use of closed-circuit television reading machines and optical aids by patients with retinitis pigmentosa and maculopathy, 292.

Pattern and Movement Detection — The influence of temporal frequency and wavelength on beta movement, 5.
Evidence of spatial tuning in peripheral vision from the pattern electroretinogram (A), 93.
Visual evoked potentials elicited by pattern stimuli in the foveal area (A), 94.
The resistance of movement displacement thresholds to optical image degradation - a clinical use ? (A), 95.
Ocular modulation transfer and sensitivity to changes in focus, 98.
Oscillatory movement displacmement thresholds: resistance to optical image degradation , 121.
Movement in decline? Oscillatory movement displacement thresholds increase with ageing, 411.

Peripheral Vision — Evidence of spatial tuning in peripheral vision from the pattern electroretinogram (A), 93.
The relationship between retinal target eccentricity and the accommodative response, (A), 97.
Variation of saccadic suppression with target eccentricity (L), 499.

Photocoagulation — A 'hidden' deficit in central vision in diabetic pan-retinal photocoagulation patients , 249.

Power Spectrum Analysis — Power spectrum analysis is the study of ocular mechanisms (TN),321.

Prism Adaptation — A clinical investigation into a possible corre lation of adaptability to induced vertical muscle imbalance and visual symptoms due to small vertical phorias (A), 95.
Heterophoria : a vergence adaptive position (MA), 507.

Pupil — A Quantitative investigation into the effects of pupil diameter and defocus on contrast sensitivity for an extended range of spatial frequencies in natural and homatropinized eyes., 21.
On the use of small artificial pupils to open-loop the accommodation system (L), 191.
Pupil response as an objective measure of visual acuity, 425.

Ray Tracing — A method of raytracing through schematic eyes with off-axis components, 149.
A schematic eye model for the effects of translation and rotation of ocular components on peripheral astigmatism, 153.
A model for retinal shape changes in ametropia, 159
Schematic modelling of peripheral astigmatism in real eyes, 235.

Reaction Time — Bad light stops play, 165.

Reading — Editorial: Towards improved visual aids for the partially sighted.
A comparative study in the use of closed-circuit television reading machines and optical aids by patients with retinitis pigmentosa and maculopathy, 293.
The effect on fixation disparity and associated heterophoria of reading at an abnormally close distance, 345.

Receptors — The physiological basis for the sensation of gloom: quantitative and qualitative aspects, 161.

Referees — Referees for 1987 manuscripts . 515.

Refractive Error — Infant refractive errors - a longitudinal study from birth to one year, (A) 93,
A longitudinal study of the age dependence of human ocular refraction - III. The mediation of changes from direct to inverse astigmatism examined by means of matrices of transition probabilities, 175.
Cessation age of childhood myopia progression (MA), 195.
The distribution of refractive errors in Nigeria, 241.
Uncorrected refractive error among a hospital population, 245.

Retinal Directional Sensitivity — Editorial: W.S. Stiles and the variation in retinal directional sensitivity, 1.
A note on the late W.S. Stiles and directional sensitivity of the retina (MA), 509.

Retinal Pigment Epithelium — A study of the electrophysiology of retinal pigment epithelium (A),95.

Retinal Scotoma — Simulation of a retinal scotoma by stabilized retinal image (TN), 495.

Retinitis Pigmentosa — Target direction effects in visual field plots in a retinitis pigmentosa family (L), 85
The manipulation of perimetric stimulus parameters in retinitis pigmentosa (A), 97.
A comparative study in the use of closed-circuit television reading machines and optical aids by patients with retinitis pigmentosa and maculopathy , 293

Saccadic Suppression — Variation of saccadic suppression with target eccentricity (L), 499.

Scattering — The attenuation of perimetric differential light sensitivity arising from intra-ocular light scatter (A), 94.

Schematic Eyes — A method of raytracing through schematic eyes with off-axis components, 149.
A schematic eye model for the effects of translation and rotation of ocular components on peripheral astigmatism, 153.
A model for retinal shape changes in ametropia, 159.
Schematic modelling of peripheral astigmatism in real eyes, 235.

South Africa — Three South African studies on the relation between road accidents and drivers' vision, 73.

Spatial Frequency — The effect of stimulus contrast on the accommodation response, 9.
A quantitative investigation into the effects of pupil diameter and defocus on contrast sensitivity for an extended range of spatial frequencies in natural and homatropinized eyes, 21.
The effect of stimulus contrast on accommodation (A), 98.
Effect of target content at higher spatial frequencies on the accuracy of the accommodation response, 137.
The effect of spatial frequency on steady-state accommodation, 211.
Impairment of contrast discrimination in amblyopic eyes, 461.

Spectacle Lenses — Generalization of the Tscherning theory: optimization of aspheric ophthalmic lenses, 63.
The effect of prismatic spectacle and contact lens corrections on ocular rotation (MA), 89.
Spectacle lenses and third-order distortion, 303.

Stabilised Retinal Images — Simulation of a retinal scotoma by a stabilized retinal image (TN), 495.

Stereopsis — Stereopsis with monovision and two concentric bifocal lens systems (A) 96.

Stiles - Crawford Effect — Editorial: W.S. Stiles and the variation in retinal directional sensitivity, 1.
A note on the late W.S. Stiles and directional sensitivity of the retina, (MA), 509.

Strabismus — Simulation of squint (L), 87.

Tears — Realiability of the wetting value of tears, 53.
Structure of the tear film during the blinking process (RN), 81.

Temporal effects — The influence of temporal frequency and wavelength on beta movement, 5.
Oscillatory movement displacement thresholds: resistance to optical image degradation, 121.
Movement in decline? Oscillatory movement displacement thresholds increase with ageing, 411.

Test Charts — An investigation of the suitablility of test charts in the testing of visual acuity in mentally handicapped patients, 93.

Threshold Elevation — Differentiating between monocular and binocular neurone responses by threshold elevation (A), 93.

Tonic Accommodation — Interocular equality of tonic accommodation and consensuality of accommodation hysteresis, 17.
The relationship between cognitive induced changes in tonic accommodation and ciliary muscle innervation (A), 96.
Time course and decay of effects of near work on tonic accommodation and tonic vergence , 131.
Variation of dark focus of accommodation with laser speckle exposure duration 143.
Effects of relaxation and aversive visual stimulation on dark focus accommodation, 219.

Tonic Vergence — Time course and decay of effects of near work on tonic accommodation and tonic vergence, 131.

Tristan da Cunha — A survey of visual defects on Tristan da Cunha , 1984, 57.

Vision Screening — A survey of visual defects on Tristan da Cunha, 1984, 57
The distribution of refractive errors in Nigeria, 241.
Uncorrected refractive error among a hospital population, 245.
Screening for retinopathy of prematurity, 401.
Clinical use of diagnostic tests, 437.
The clinical significance of change, 441.
The application of a comprehensive visual screening programme to children aged 3 to 5 years,469.
Eye disease in Northern Nigeria: prevalence, age and sex differences, 481.

Vision Tests — The use of computerized contrast sensitivity,Arden gratings and low contrast letter charts in the assessment of amblyopia, 43.

Three South African studies on the relation between road accidents and drivers' vision , 73.
An investigation of the suitability of test charts in the testing of visual acuity in mentally handicapped patients, 93.
Vision and driving, 187.
Editorial: Vision behind the cataract, 207
Theory and evidence for a clinical hyperacuity test,431.
Clinical use of diagnostic tests,437.
The clinical significance of change, 441.
The application of comprehensive visual screening programme to children aged 3 to 5 years, 469.

Visual Acuity — The use of computerized contrast sensitivity, Arden gratings and low contrast letter charts in the assessment of amblyopia, 43.
An investigation of the suitability of test charts in the testing of visual acuity in mentally handicapped patients, 93.
The resistance of movement displacement thresholds to optical image degradation - a clinical use?(A), 95.
Visual acuity prediction using the visual evoked response, 421.
Pupil response as an objective measure of visual acuity , 425.

Visual Evoked Responses — Visual evoked potentials elicited by pattern stimuli in the foveal area A), 94.
Visual acuity prediction using the visual evoked response, 421.

Visual Fields — Target direction effects in visual field plots in a retinitis pigmentosa family (L), 85.
The attenuation of perimetric differential light sensitivity arising from intra-ocular light scatter (A), 94.
The distribution of visual field scores in a normal population,(A), 94.
The manipulation of perimetric stimulus parameters in retinitis pigmentosa (A), 97.
Effect of defocus on visual field measurement, 259

Visual Fields Computer-assisted perimetry (A), 447.

Wetting Value Reliability of the wetting value of tears, 53.

World Optometry World Optometry, 115.

R. A. WEALE, Institute of Ophthalmology, London, U.K.

G. WESTHEIMER, F.R.S., Department of Anatomy/Physiology, University of California, Berkeley, U.S.A.

Aims and Scope

Ophthalmic & Physiological Optics is an interdisciplinary journal containing papers dealing with both pure and applied aspects of visual science. While emphasis is given to matters of importance to ophthalmic opticians (optometrists), many of the topics discussed are of interest to visual psychologists, physiologists and others concerned with the development, use and restoration of vision.

Theoretical, experimental, observational or historical papers on all aspects of visual science are welcomed. Basic studies might concern the development and use of vision. Articles dealing with the practice of opthalmic optics (optometry) and its related instrumentation are major components of the journal, topics ranging from the design of spectacle and contact lenses to the use of drugs and ocular disease. Emphasis is also given to problems in applied vision in such situations as driving, optical instrumentation and visual displays.

Advertising management and enquiries to: Mr T. H. Collingridge, British College of Ophthalmic Opticians, 10 Knaresborough Place, London SW5 0TG, U.K. Telephone: (01) 373 7765.

Published quarterly.

Annual institutional subscription rate (1987): DM 310.00. Two-year institutional rate (1987/88): DM 589.00. Prices include postage and insurance.

Personal subscription rate for individual members of professional optical societies (for personal use only): DM 114.00. Prices are subject to change without notice. Subscription enquiries from customers in North America should be sent to: Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A., and for the remainder of the world to: Pergamon Journals Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.

Microform Subscriptions and Back Issues

Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical photocopying recording or otherwise, without permission in writing from the copyright holder.

Photocopying Information for Users in the U.S.A.

The Item-Fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970.

Permission for Other Use

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-Fee Code for this publication is: 0275-5408/87 $3.00 + 0.00

CONTENTS OF VOLUME 7

Volume 7 Number 1

	1	Editorial
T. Buckingham	5	The influence of temporal frequency and wavelength on beta movement
P. A. Ward	9	The effect of stimulus contrast on the accommodation response
S. K. Fisher, K. J. Ciuffreda and S. Hammer	17	Interocular equality of tonic accommodation and consensuality of accommodative hysteresis
C. D. Kay and J. D. Morrison	21	A quantitative investigation into the effects of pupil diameter and defocus on contrast sensitivity for an extended range of spatial frequencies in natural and homatropinized eyes
C. Boylan and R. A. Clement	31	Excursion tests of ocular motility
L. D. Pickwell, T. C. A. Jenkins and A. A. Yetka	37	Fixation disparity in binocular stress
V. A. Brown, R. M. L. Doran and J. M. Woodhouse	43	The use of computerized contrast sensitivity, Arden gratings and low contrast letter charts in the assessment of amblyopia
D. F. C. Loran, C. N. French, S. Y. Lam and E. Papas	53	Reliability of the wetting value of tears
K. A. Harwood	57	A survey of visual defects on Tristan da Cunha, 1984
F. Le Texier, W. Lenne and J.-L. Mercier	63	Generalization of the Tscherning theory: optimization of aspheric ophthalmic lenses
D. Humphriss	73	Three South African studies on the relation between road accidents and drivers' vision
Research Note		
G. Forst	81	Structure of the tear film during the blinking process
Letters to the Editor		
S. P. Taylor	85	Target direction effects in visual field plots in a retinitis pigmentosa family
D. B. Stidwill	87	Simulation of squint
Matters Arising		
H. Obstfeld	89	The effect of prismatic spectacle and contact lens corrections on ocular rotation
